

5202 Bano hygienic washbasin with grab bar

5202 Bano hygienic washbasin with grab bar

Easy and hygienic

Bano hygiene washbasin is made especially regarding easy and hygienic cleaning. The underside has a cover which effectively hides tubes and pipes and simplifies the task of cleaning.

Functionally designed

The washbasin is designed to meet the user's needs. It has a solid grab bar in front which provides security for the user. The washbasin has drainage in the front and is therefore well adjusted for wheel chair users. There is storage room on both sides of the washbasin.

Height adjustable

The washbasin is used with Bano's wall mounted module for height adjustment (5207-EL electrical, or 5207-MA manual with crank). Both modules help reduce strain on nursing staff by being easily adjusted in height to fit the user's needs. The height adjusters can be operated by one person.

Load tested up to 300kg.

Materials

- Washbasin: crushed marble with gelcoat surface
- Built in grab bars: coated with polyester paint
- Cover: ABS/PMMA
