

5995EC Bano easy clean toilet bowl, 700mm

5995EC Bano easy clean toilet bowl, 700mm

Wall-mounted toilet for built-in cistern

The Bano toilet is ergonomically designed to ensure that users sit safely and comfortably. The EC model had the internal flush rim edge removed, so that the inside of the bowl can be easily cleaned. The result is a hygienic toilet bowl where you can easily wipe it instead of using strong or special detergent that is commonly used to clean traditional flushing rim edges.

The toilet bowl extends 700mm, and when installed with Bano cisterns (5970S3-EL or 5970-MA) it can be raised and lowered electrically or manually by a hand crank up to 200mm so that the height ideally suits the user.

Load tested up to 500kg.

Recommended amount of water: 3/6L

Minimum amount of water: 2/4L according to EN 997

CE NO/EN 997

Materials

- Glazed porcelain
