5970S3-EL Bano height adjustable toilet, electrical

Bano’s height-adjustable cisterns can be adjusted electrically. This lightens the carer’s work load because one person can quickly and easily adjust the height of the toilet to fit the users need. The height of the toilet can be adjusted from 410 to 610mm. For bathrooms with external pipes an extension for the cistern must be used. See Bano interface for details.

The cistern is supplied with electrical height adjusters. With simple steps the height of the toilet and the toilet grab bars can be adjusted.

Load tested up to 500kg.

Dual flush: 3/6l preset, max. 4,5/7l

Materials

• Construction in galvanized steel

• Cover in ABS/ PMMA

Grab Bars Materials

• Anodized aluminum

• Polyurethan plastic
