5600 Bano toilet grab bar height adjustable 900mm

Bano toilet grab bar height adjustable, mounting on wall

The height of the support bar is simple to adjust from 700 to 900mm. The generous length provides good ergonomic support. By bending forwards and using upper body strength, users can easily move on and off the toilet. The end of the grab bar has a smart designed "handle" that provides a good, secure grip. When it is not in use, the grab bar can be folded up against the wall to free up floor space.

Bano also supplies a 700mm grab bar with and without height adjustment. This is intended for use in situations where space is limited.

Load tested up to 250kg.

Materials

- Structural foam with polyurethane coating
- Natural anodized aluminum alloy
