

5700-02 Bano height adjustable shower seat

5700-02 Bano height adjustable shower seat

Ergonomic shape and tempered surface

Bano shower seat features a range of benefits. It is ergonomically shaped and covered with structural foam to provide a soft, tempered surface. There is a hole in the middle to allow the water to run off. Easy to clean.

With height adjustment

The height of the shower seat is simple to adjust. The height of the shower seat can be adjusted from 400–600mm (200mm) with the armrests. The wall mounted fixing brackets provide a solid construction, and the shower seat has been load tested to 500kg. The seat can be folded up against the wall when not in use.

With or without armrest

If the user needs extra support, armrests can be attached to the same wall mounted rail as used for the shower seat. The armrests are made of the same material as the shower seat. The armrests are sold separately.

Materials

- Seat: structural foam with polyurethane coating
- Fixing rails: natural anodized aluminum alloy
- Plastic caps: injection-moulded polypropylene
