### Maintenance instructions

The product is cleaned with regular household / institutions cleaners. Use a soft cloth or sponge with a mild detergent. Apply on the cabinet and wipe off with a damp cloth. Scouring powder and steel wool should not be used as it destroys the finish. Detergents containing alcohol and used in the pharmaceutical industry are OK. Detergent with very low PH may cause the surface to become matt.

*Thank you for taking the time to read these instructions carefully – it is time well spent!*
